HIGH PRESSURE WASH

Highly concentrated powerful foam cleaner for contactless cleaning of trucks, containers and tankers

(Code 857) - 20L

pH

Properties

Emulsifies easily with traffic film and heavy industrial contamination to create a streak-free, shiny surface. The unique composition of the product guarantees a stable foam blanket that is very effective in loosening contamination-even on vertical surfaces. Preferably, do not use in bright sunlight.

Dosage and Use

Depending on the contamination and surface, dilute 2%-4% (1:50 to 1:25). Suitable for brush cleaning, high pressure cleaning and foam cleaning. Preferably, give the product time to work in. Then remove or spray with clean water. Using hot water increases the cleaning power.
