RESPIRATORY PROTECTION

DISPOSABLE FILTERING FACEPIECES
MANDIL FFP3/V

Mandil, ancient word from arabic meaning the handkerchief used by Bedouins to protect their mouths from the desert sand. The series of disposable filtering facepiece conforms to EN 149:2001+A1:2009. It is a complete range including FFP1, FFP2 and **FFP3** class with or without exhalation valve, some models of which designed with special filtering element against nuisance odour.The multilayer cone facepiece is anatomic, comfortable is skin, and provides a progressive protection. The two-piece-elastic headband assures an even face-contour adhesion.

FEATURES

- Filtering facepiece against solid and liquid aerosols, in compliance with Class FFP3 of EN 149:2001; low breathing resistance; filtering capacity well above 99% when tested against NaCl; filtering capacity well above 99% when tested against paraffin- oil mist.

COMPONENTS

- Filtering element enclosed between two protective layers;
- exhalation valve;
- adjustable four points harness made of elastic fabric;
- soft continuous sealing lip;
- adjustable nose clip;
- upper nose sealing lip made of soft synthetic rubber.
